Late Backup

WHEREAS St. David's HealthCare and Seton Healthcare Family provide invaluable healthcare services to our community with more than \$100 million of uncompensated care in Travis County alone;

WHEREAS the City of Austin recognizes other important organizations that make significant contributions to the well-being of our community, such as places of worship, AISD, and the University of Texas at Austin, through Austin Energy long-term contracts; and

WHEREAS Seton Healthcare Family and St. David's HealthCare have acknowledged that during this additional 6-month extension of their long-term contracts for their primary and secondary accounts, the hospitals will need to negotiate gradual rate increases with Austin Energy.

BE IT SO MOVED:

Any Hospital System that (i) currently has an LPSSC Rider II contract and (ii) provides more than \$10 million in uncompensated care annually as reported to the State of Texas, may extend their existing Large Primary Service Special Contract Rider II agreement (for only the primary and secondary accounts listed in the agreements) to provide a term of June 1, 2015, to the end of the customer's billing month that includes November 30, 2015.
